PRESENTED BY

THE PARTNERSHIP TO HELP KIDS

NAME: Maxwell

CURRENT AGE: 4 years old

Max Majewski, age 4, is under the care of Dr. Edward Dabrowski at Corewell Health Children's as he bravely faces a rare genetic condition known as early-onset, de novo spastic paraplegia type 4 (SPG4).

This progressive disorder causes significant muscle tightness and weakness, leaving Max's legs currently unable to support his body weight.

In 2024, Max received a specially adapted bike from Corewell Health Children's and Children's Miracle Network—a gift that has become a powerful tool in his physical therapy journey.

Beyond its therapeutic benefits, the bike has opened up new opportunities for Max to connect with other children in his neighborhood and enjoy the simple joys of outdoor play.
